# THE EASIEST AND FASTEST STL BASING SOFTWARE ON THE MARKET

No need to download software to view and base your 3D models. Engineered to work with any standard STL file, EasyRx 3D provides you a fast, simple and efficient solution to view and base STL files.

- 100% Cloud – no software download to view, trim and base your 3D/STL files any longer
- EasyRx 3D is compatible with EasyRx Practice and Lab suite of products, including VisualDLP
- Compatible with standard browsers like Chrome, Safari, Firefox, Edge
- Compatible industry including iTero, TRIOS, Planmeca, Carestream, Medit, Sirona and more

\*EasyRx 3D View is a standard feature in all EasyRx Practice and EasyRx Lab plans.

\*\*Easyrx 3D Edit is included in EasyRx Practice EasyRx 3D - Standard and Premium plans and EasyRx Lab Standard, Premium and Enterprise plans.

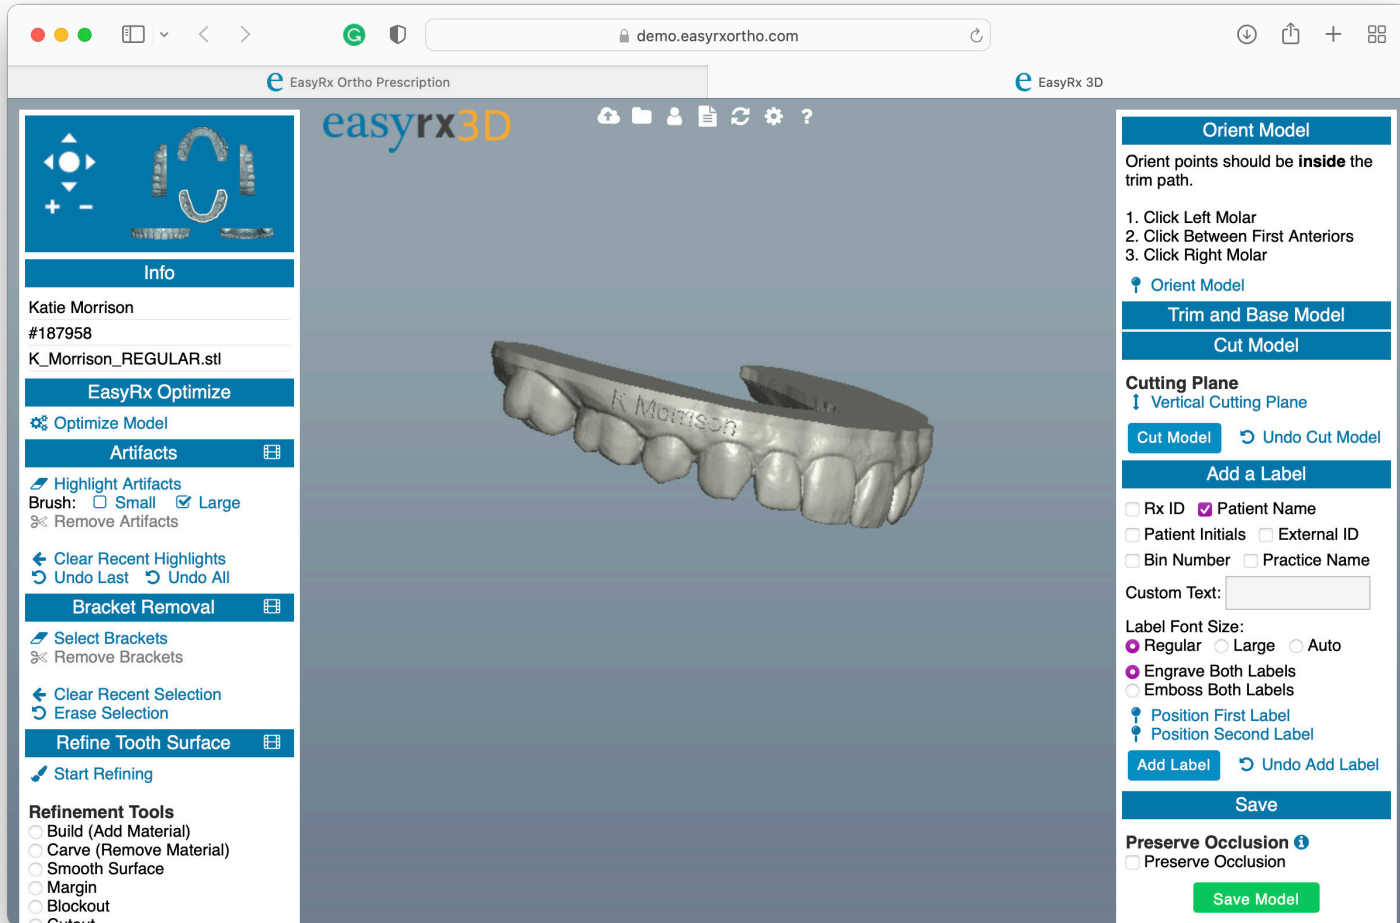

#### EasyRx View\*

- Quickly and easily view standard 3D/STL files inside your browser
- Includes STL File Optimize feature

#### EasyRx 3D Edit\*\*

- Trim, base and label STL files
- Artifact Removal Tool
- Add Regular and Hollow bases
- Add Angeled bases, Chamfered bases and drain holes
- Set base height and wall thickness on hollow models
- Freeform Cutting Plane supports placing a cutting plane anywhere on a model, facing whatever direction and at whatever angle necessary
- Add labels to models, like patient name, date, Rx number
- Save based STL files

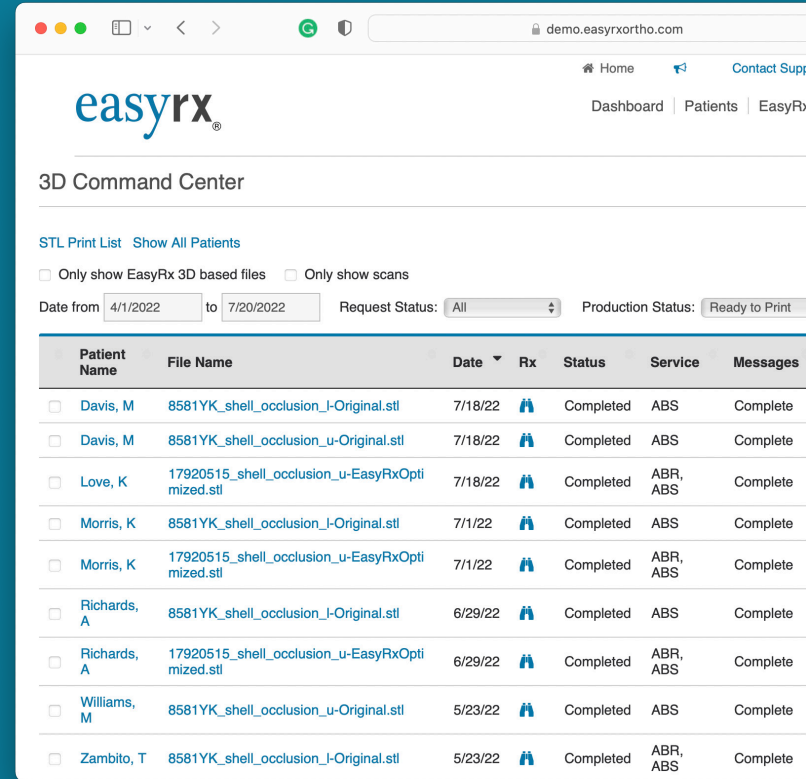

# The Next Generation of 3D Software

# EasyRx 3D Command Center

## Control all 3D tasks from one central location

- One dashboard to control and review all 3D tasks
- Quickly see the status of all of your models
- View or edit models in EasyRx 3D
- Request Automated Services from one dashboard
- Easily filter models by date, if the model is ready to be printed, and more

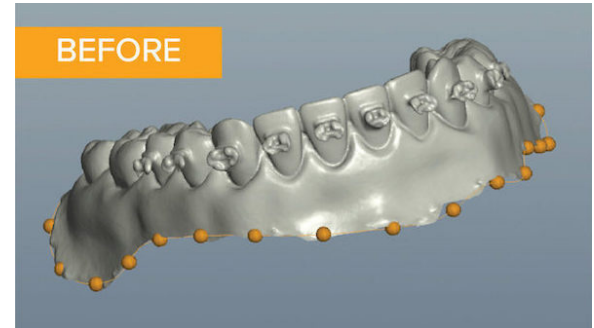

## Automate 3D model editing with ease using AI powered technology

EasyRx 3D Automated Services uses AI technology to prepare print ready 3D files; allowing users to move through the 3D editing process with ease, saving time and increasing productivity.

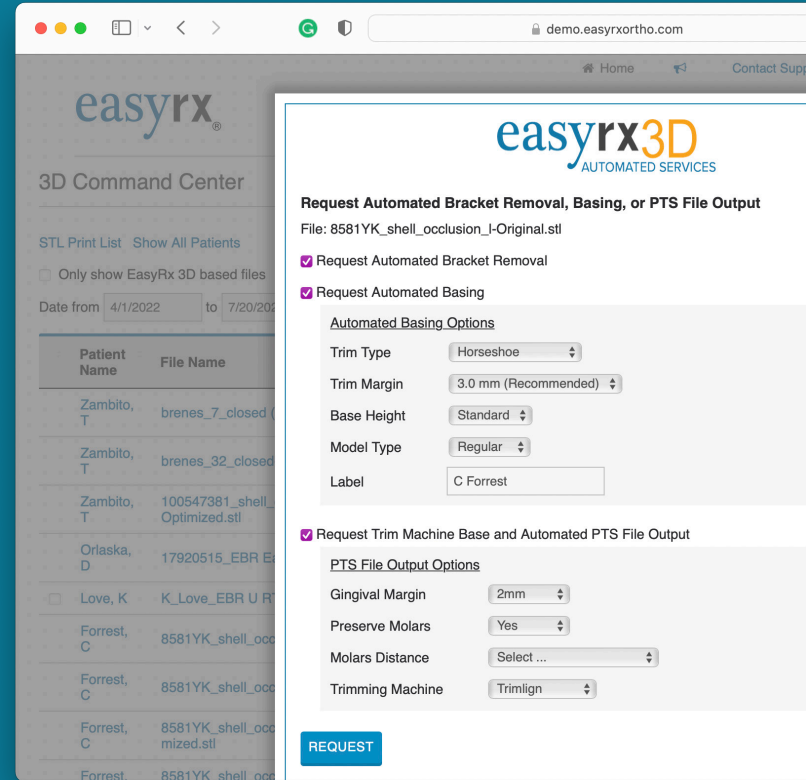

- **Automated Basing** automatically trims, bases, and labels STL files, delivering print-ready 3D files
- **Automated Bracket Removal** automatically scans and digitally removes brackets from files
- **PTS Trim Line File Output** automatically adds a trimming path for aligner trimming machines

# EasyRx 3D Automated Services

Files are automatically based and brackets are digitally removed

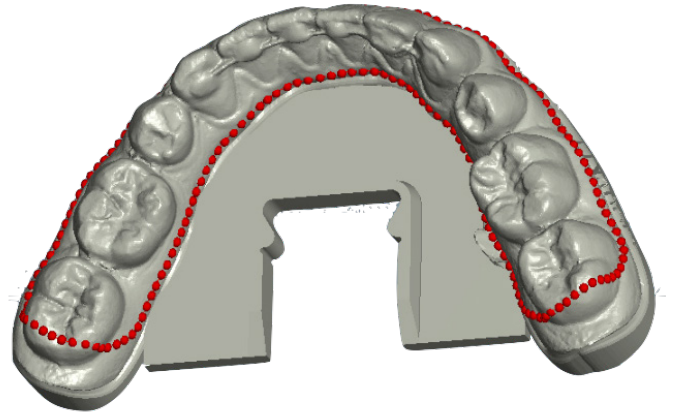

- No user interaction is required.
- What once may have taken 5 or 10 minutes per arch, now is done automatically.
- Free up critical lab tech time to focus on other important and valuable tasks
- Users can choose which files run through the automated services and set default options for basing and labeling models.
- Supports iTero and TRIOS scans (others scanner support pending)
- EasyRx 3D Automated Services includes our manual Bracket Removal Software and all of the refinement tools such as build, carve, smooth and more

# PTS Trim Line File Output

## Automatically add PTS Trim Lines to models

- If you own an automated aligner or retainer trimming machine, EasyRx 3D Automated Services generates the required PTS Trim Line for these machines
- When Auto-based models are requested, also request the corresponding PTS Trim Line File output
- The Auto-based file and supporting PTS file are attached to the prescription and patient file, ready for download
- When opening the Auto-based file in EasyRx 3D Viewer, view and adjust the PTS Trim Line as needed
- Supports the Digital Dental, MAXX and Ortho Automation Trimline machines

# EasyRx 3D Automated Services Pricing

PER SCAN PLAN

**\$595**

to Enable Automated Services

Unlimited Arches For First 30 Days

Per Arch Price:

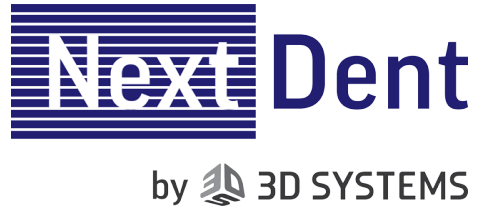

ABS Only: \$1.50

ABR Only: \$2.00

ABR and ABS: \$3.00

PTS Trim Line: \$0.45

## 3D Printer Integrations

“

Fantastic tool for orthodontic  
and dental offices and labs  
alike...streamlines the digital  
and 3D process.

”
